

CASE OF THE WEEK

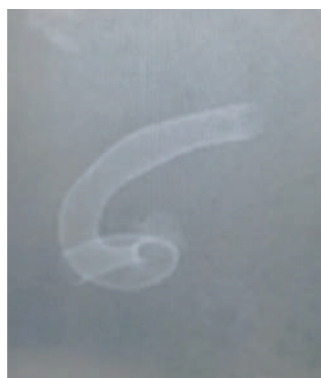

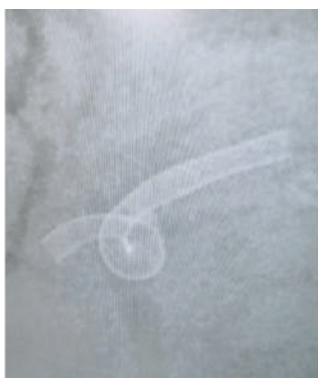

Right Posterior Cerebral Artery Aneurysm managed with Flow Diverter Placement Technique

AT APOLLOMEDICS HOSPITALS, LUCKNOW

Mr. Arvind Kumar Rastogi presented at **ApolloMedics, Lucknow** with history of brain stroke and subarachnoid hemorrhage i.e. bleeding in the brain. CT Angiography showed **Right Posterior Cerebral Artery Aneurysm** which was the cause of bleeding.

A new advanced technique known as **Flow Diverter Placement** was used to manage this cerebral aneurysm. Flow diverter prevents flow of blood in aneurysm thus causing its occlusion.

There was no complications post op and the procedure went very well. The patient was discharged with good health and was stable completely

Procedure Performed by
Prof. R V Phadke, Dr Arpit Taunk & Team
